JCT Design and Build 2016

**Contract Value**

£5.1m

## St Christopher's Hospice, Sydenham

### The Learning Hub

St Christopher's Hospice provides skilled and compassionate end of life care and bereavement support, combining specialist care, research and education. Jerram Falkus is undertaking The Learning Hub project for the Hospice which will include;

- A flexible lecture space for up to 120 people, which can divide into three smaller teaching rooms to accommodate multiple groups at a time and separate meeting room space.
- An open welcoming foyer space for conducting public events and concerts
- A Skills Lab for practical training, with beds and teaching space
- Embedded webinar, conferencing and other technology to enhance learning and widen access nationally and internationally.

**Phase 1** - design and construction of a new steel frame building, which will be clad in glass, brick and polycarbonate cladding along with an internal fit-out to create teaching spaces and associated facilities. **Phase 2** – Demolition of existing Education Centre to enable a new car park (58 spaces) to be created to the south of the site.

The new building will enable the Hospice to train more people to deliver high quality end of life care. The training provided by the Learning Hub will be for professionals, as well as wider community members including family, friends and carers.
